Policies for Handling Student Activities that Support Creativity During the Academic Year

- Introducing students to the available student activities.
- Introducing students to the Youth Welfare Unit and how to contact it.
- Encouraging students to take part in student activities.
- Enlisting students who wish to take part in department activities such as Scientific Day and medical convoys.
- Cooperating with students to facilitate their participation in various activities while ensuring their attendance on their scheduled academic days.
- Publicizing any activities received by the faculty, such as competitions, on various communication platforms.
- Commending outstanding students in the activity.
- Encouraging students toward innovation and helping them implement their innovations.

Student Activities Report of the Pediatric Nursing Department

1. The Pediatric Nursing Department adopts a vision of excellence and constructive critical thinking; the department is therefore keen to provide academic support by encouraging outstanding third-year students and supporting them in creativity and innovation.
2. It also embraces the need for openness to the community and serving both the internal and external environment through various student projects, encouraging students to actively participate in these projects. Examples of student projects in which students and faculty members of the department took part include:

The mission of the pediatric nursing department is to maintain a competency-based education through evidence-based nursing practices to provide the candidate with knowledge and new trends necessary for safe and accurate nursing interventions for children in health and illness in different – age groups.
