

Hanan Mahrous Mohamed Ismail Zahin

Nursing Specialist | Clinical Instructor in Community Health Nursing

[Damanhour, Egypt]

Professional Profile

Dedicated Nursing Specialist and Clinical Instructor with professional experience in nursing education and community health nursing since 2020. Skilled in supporting undergraduate nursing students through clinical instruction, translating theoretical knowledge into safe nursing practice, and contributing to community-focused health education. Currently pursuing a Master’s degree in Community Health Nursing, with additional academic preparation in healthcare quality and hospital management. Recognized for effective communication, problem-solving, time management, and a strong commitment to patient-centered care and student development.

Areas of Expertise

Professional Practice	Teaching and Academic Support
Community health nursing practice	Clinical instruction for nursing students
Health education and promotion	Demonstration of nursing procedures
Family- and community-oriented care	Student supervision and performance feedback
Basic nursing assessment and care planning	Linking classroom learning with clinical practice
Infection prevention and patient safety	Communication with students and healthcare teams
Healthcare quality principles	Supporting reflective learning and professional conduct

Professional Experience

Nursing Specialist and Clinical Instructor — Community Health Nursing

Faculty of Nursing, [Damanhour University], Egypt · 2020–Present

- Provide clinical instruction and practical guidance to nursing students in community health nursing settings.
- Supervise students during clinical training and help them apply nursing principles in real-world community and primary healthcare contexts.
- Demonstrate and reinforce safe nursing procedures, infection-prevention measures, health assessment, documentation, and patient education.
- Support students in developing communication, health-promotion, family-care, and community-assessment skills.
- Observe student performance, provide constructive feedback, and contribute to the evaluation of clinical competencies.
- Promote ethical practice, professionalism, teamwork, confidentiality, and respect for patients and families.
- Participate in academic and departmental activities related to nursing education and community health nursing.
